

ENERGY CONSERVATION INCENTIVE (ECI) PROGRAM

Prerequisites for Receiving Your ECI

1. To qualify for their ECI residents must be participants in the Lyons Green Heart Community Initiative and have received an Eco Audit from a GHI staff member or a qualified volunteer Eco Auditor.
2. Participants must have attended one of the Green Heart Community Initiative orientation classes and have entered at least 3 months of their household data into the online LCL Tracking system.
3. Participants must provide a written receipt(s) for the item(s) they've purchased in order to receive reimbursement for qualifying expenditures up to \$300.
4. Participants may use their ECI for partial payment for an item (e.g. \$300 towards an energy efficient water heater that costs \$400), but they will not be given cash for unspent monies (e.g. if they spend \$200 for an energy audit, \$100 will remain in their account for further reimbursement but will not be issued for items not yet purchased.)
5. All ECI payments must be requested and issued to the homeowner within a calendar year from the date a participant receives their initial Eco Audit, unless written permission is received for an extension. All unspent monies will end up in the Green Heart Community Initiative general fund.
6. ECIs will be issued by check(s) made out to the participant who is registered in the Green Heart Community Initiative, not to vendors or unregistered persons.
7. Participants will be given their ECI only as reimbursement towards items listed as Qualifying Incentives. Written permission must be received from the Green Heart Institute for any items not registered as Qualifying Incentive Items. Participants may be asked to demonstrate how their item will help reduce their environmental impact.
8. To redeem your ECI mail the receipt(s) along with a description of the item(s), and your name to the mailing address below. The ECI will be mailed to your registration address.

Green Heart Institute
